

main.c

Output

```
1  #include <stdio.h>
2  int main() {
3      char op;
4      float a, b;
5      printf("Enter operator (+,-,*,/):
        ");
6      scanf(" %c", &op);
7      printf("Enter two numbers: ");
8      scanf("%f %f", &a, &b);
9      if(op=='+') printf("Result = %.2f"
        , a+b);
10     else if(op=='-') printf("Result =
        %.2f", a-b);
11     else if(op=='*') printf("Result =
        %.2f", a*b);
12     else if(op=='/') printf("Result =
        %.2f", a/b);
13     else printf("Invalid operator");
14     return 0;
15 }
```

Run

main.c

Output

Enter operator (+, -, \*, /): \*

Enter two numbers: 2 6

Result = 12.00
